

Aid Policy

Rwanda's Aid Policy document was endorsed by Cabinet in July 2006. It sets out the Government of Rwanda's vision for improved aid management, and those policies which will turn this vision into reality. The Policy acts as a strong foundation for improvements, on the part of both government and development partners to increase aid effectiveness in order to improve service delivery to the Rwandan and accelerating the implementation of the Economic Development and Poverty Reduction Strategy (EDPRS).

The Aid policy clarifies what Rwanda wants to achieve with its assistance, preferences in terms of mobilization and management of assistance, and the changes necessary in order to reach these goals.
